

You design - We print!

Your supplier of printed dishcloths and towels

MADE BY IN SWEDEN

Teko Tryck - Cooperation is our mission

We have delivered screen printed Swedish dishcloths and towels of the highest quality to designers, companies, chain stores and distributors for more than 35 years.

The original. Teko Tryck introduced the screen printed Swedish dishcloth on the market 1994. Most design and promotion cloths on the world market are printed by us in Sölvesborg in south Sweden. We are an international company delivering to eg Germany, France, USA, Canada, Japan, South Korea and Australia.

We believe that blue is green. And so are red and yellow

We use water based colours with minimum environmental impact. They are blended in our colour room in order to provide the exact shade for the company logo or the exact yellow tone you imagine when you created your pattern. For us it is simply a matter of respect - for nature and for what is important for you. Respect is an integral aspect for creating long-term relationships with both customers and suppliers and this represents a key objective for us. This leads to significantly improved results. And it makes our work far more interesting.

**You design - We print!
Handmade in Sweden!**

Benefit from our partners

We would like to recommend Formpress on the island of Öland. They offer the opportunity to print your designs or messages on serving trays crafted in birch veneer, coasters, cutting boards and tray tables. Visit their website www.formpress.com.

We can also establish contacts with leading Swedish designers.

The Swedish dishcloth - Our everyday hero

The original since 1994. Teko Tryck introduced the screen printed dish cloths on the market 1994, since then millions cloths have left our factory. This pure natural product will cheer up the kitchen work with your unique design, everyday!

We print for among others H&M, Moomin, Lisa Larson, Nobel Peace Center, Disney, Zarah Home, Laura Ashley, Anneko Design Sweden and Galleri Ann. For us, all jobs and customers are equally important and we see ourselves as a part of your team. We can print for you as well, be inspired!

We want to contribute to a cleaner world

The Swedish dishcloth is made of 100% biodegradable material - cellulose from FSC-marked forest and cotton. Once the cloth reaches the end of its service life, it makes its way to the compost, where it decomposes in 6-8 weeks.

The dishcloth was invented by engineer Curt Lindqvist in Sweden as early as 1949. A great deal has happened since the invention 70 years ago, but our everyday hero, remains the same.

An eco-friendly, compostable everyday hero

The Swedish dishcloth is more than "just" incredibly useful - it is also kind to the environment. The cloth helps to cut consumption of paper towels and is the perfect replacement for other cloths, which often contain plastic. What is more, it can be washed in washing machine or dishwasher, boiled and reused a limitless number of times. Well, almost limitless. The inks we use for the printing are of course water based and eco-friendly.

*The dishcloth is taken for granted in Sweden - a natural part of our everyday life.
In our opinion, the dishcloth is an everyday hero.*

Kitchen towels - Your daily piece of art

50% linen / 50% cotton and 100% linen

Teko Tryck provides you with a kitchen towel which will be in demand and used year after year. On this kind of fabric we can print very detailed things. The structure gives texture and depth. Our kitchen towels are sewn and woven in Lithuania and are available in two qualities: 100% linen and 50% linen / 50% cotton. Production this close to Sweden is good for the environment as well as helps us cut lead times.

Printed with our water based and environmentally friendly colour. Washable in 40 degrees Celsius.
