

# ANETTE WIE / DESIGNPARKEN

Designparken is a Norwegian design company that makes eco conscious home goods. Designparken is established by Anette Wie. All products are designed by her, the fabrication is made locally in Europe with super environmentally friendly materials. Her mission is to **make everyday to a party**. Serve freshly broued coffee on a trendy coaster, the cheese on a very stish cutting board and the treat, the small cookies on the coolest and best looking tray. She wish to bring style into the kitchen in a playful and cool way. Anette collaborates with firms, museum and stores to make own collections also. And she make pattern, graphic designs and logo.

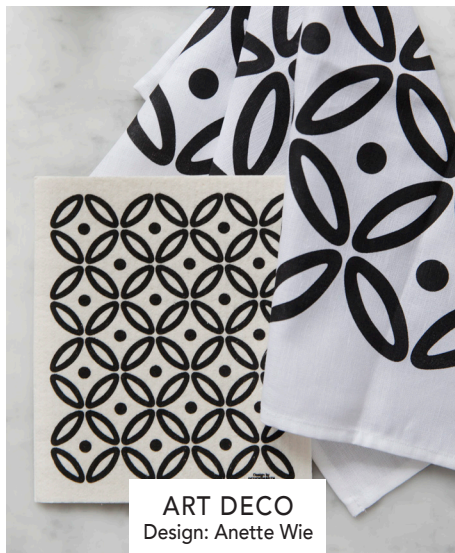

Inspiration is from nature, cultural heritage, travelling and daily life. The art deco period's strict design language is also a key element in the Designparken's collections.

I have been working as a art director and designer for 25 years, the latest 6 year for her own company Designparken. Showroom and office is right outside Oslo, Norway. You will find sponge cloths, teatowel, cutting board, tray, coaster, enamel cups, breadbag, napkins, matches and more in the collections.
