

You design - We print!

Your supplier of printed Swedish dishcloths and towels

Teko Tryck - Cooperation is our mission

We deliver screen printed Swedish dishcloths, kitchen towels and velour towels of the highest quality to designers, companies, chain stores and distributors worldwide.

The original. Teko Tryck introduced the screen printed Swedish dishcloth on the market 1994. Most design and promotion cloths on the world market are printed by us in Sölvesborg, in south Sweden. We are an international company, delivering to eg Germany, France, USA, Canada, Japan, South Korea, Australia and more.

We believe that blue is green; and so are red and yellow

We use water based ink with minimum environmental impact. They are blended in our colour room in order to provide the exact shade for the company logo or the exact yellow tone you imagined when you created your pattern. For us it is simply a matter of respect - for nature and for what is important to you. Respect is an integral aspect for creating long-term relationships with both customers and suppliers and this represents a key objective for us. This leads to significantly improved results. And it makes our work far more interesting.

Benefit from our partners

We would like to recommend Formpress on the island of Öland. They offer the opportunity to print your designs or messages on serving trays crafted in birch veneer, coasters and tray tables. Visit their website formpress.com.

We can also establish contacts with leading Scandinavian designers.

We Want to Contribute to a Cleaner World

The Swedish dishcloth is made of 100 % biodegradable material – cellulose from FSC-certified forest and cotton from waste production (cotton fibers that are too short for textile industry use). Once the cloth reaches the end of its service life, it makes its way to the compost, where it decomposes in 8-12 weeks.

The dishcloth was invented by engineer Curt Lindqvist in Sweden as early as 1949. A great deal has happened since the invention, but our everyday hero, remains the same.

An eco-friendly, compostable everyday hero

The Swedish dishcloth is more than "just" incredibly useful – it is also kind to the environment. The cloth helps to cut consumption of paper towels and is the perfect replacement for other cloths, which often contain plastic. What is more, it can be washed in the washing machine or dishwasher, or even boiled. Then it can be reused a limitless number of times. Well, almost limitless. The inks we use for the printing are of course water based and eco-friendly.

The dishcloth is taken for granted in Sweden - a natural part of our everyday life. In our opinion, the dishcloth is an everyday hero that will benefit the rest of the world too.

The Swedish Dishcloth:

- 100% compostable
- 70% cellulose (FSC-certified forest)
30% cotton (fiber that are too short for textile industry use)
- Washable in dishwasher / washing machine, over and over again
- Absorbs 15 times its own weight
- Printed with environmentally friendly, water based ink
- Replaces other cloths that often contains plastics
- Contributes to reduced use of paper towels
- From forest to earth, the circle is closed

Stand out in the crowd with figure shaped cloths

Punched dishcloths stand out in the crowd.

Punched dishcloths

We can offer you figure shaped dishcloths after your wishes. Your special punch tool cost comes only once, then there will be an additional punching cost for each printed dishcloth.

Figure shaped punch tools ready for your design

- Heart small
- Heart big
- Flower small
- Round big

No cost for the tool if you choose one of these.

Dyed Swedish Dishcloths - A perfect match!

Beside the printed dishcloths, we offer dyed dishcloths in any colour you wish for. A lovely product to match your collection.

Choose your own PMS U colour for plain cloths. Dyed with GOTS-colours (Global Organic Textile standard). We deliver them folded and unprinted. After the dyeing process they will decrease in size but almost regain its normal size in wet condition (approximately 190x185 mm). The dyed dishcloths look beautiful packed with a paper banner.

Kitchen Towels - Your daily piece of art

Teko Tryck provides you with a kitchen towel which will be in demand and used year after year. On this kind of fabric we can print very detailed things. The structure gives texture and depth.

Our kitchen towels are sewn and woven in Lithuania and are available in two qualities. Production this close to Sweden is good for the environment, as well as helping us cut lead times.

Printed with our water based and environmentally friendly ink.
Washable in 40 degrees Celsius.

Textile Bags - An environmentally good alternative

A better alternative for the environment than plastic bags.

Anyone can use a textile bag! And the textile bag is, apart from a practical commercial attribute, a better alternative than the plastic bag for the environment. It's appreciated both as a giveaway and as a product in your assortment. With your own print on, it's a unique product. It fits for all kind of motives - logo, illustration and text.

We have many different suppliers and environmental alternatives.

Packing, Labels & Distribution

Teko Tryck always tries to find the best solution for your request and offer custom made packaging after printing your products.

We are there for you all the way, from ideas to delivery of the products, in ways that suits you. We offer you solutions like plastic bags, cartons, labels and banners and we are always looking forward for new way to pack and promote your products.

Packing, Labels & Distribution

Banners

Paper banners are a nice and price efficient alternative to pack dishcloths and kitchen towels.

Choose between white uncoated/coated or brown recycled paper, printed digital or in offset, in CMYK or just black. The banners are sealed with regular tape as standard.

Folded Towels

3 common ways to fold a kitchen towel in size 50x70 cm:

- A: 130 mm x 180 mm
- B: 125 mm x 245 mm
- C: 170 mm x 235 mm

Labels with Bar Codes

Standard labels in white:

- A: 60x80 mm
- B: 60x40 mm

Printed in black, with your text and bar code in high resolution. The placement of the label is often on the back, in the lower right corner of the dishcloth or towel, or on a pack of products packed in shrink bag.

Kit / Set

Trays, kitchen towels and dishcloths packed in different sets.

We have close collaboration with Formpress AB on the island of Öland, Sweden. They are a producer of serving trays and coasters in birch veneer. www.formpress.com

Boxes and Stands

Dishcloth box

Fits 50 dishcloths.
Unfolded boxes can easily be sent in a carton together with dishcloths.

Dishcloth stand

Fits 500 dishcloths.
Unfolded stands can easily be sent together on a pallet with dishcloths.

Dishcloth cards

A useful and lovely greeting

Dishcloth + envelope + note paper in a transparent bag. Instead of a regular greeting card. Very appreciated.

Shrink bags

Distribution packaging

Pack dishcloths or towels in shrink bags, for example 10 towels or 20 dishcloths together, to easily distribute and protect the printed products.
